

Introducing Apple Music Sing 🎤

Available in December

Apple Music Sing is a new way to hum, rap, jam, or sing along with millions of your favorite songs. Newly enhanced beat-by-beat lyrics make it even easier to follow along with the music. Fully adjustable vocals let you duet with the original artist, sing solo, or mix it up.

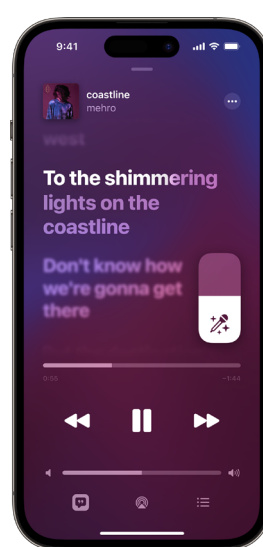

Overview

Apple Music Sing takes the best lyrics experience to the next level. We've made it even easier to sing along with your favorite artists, however you choose – at home, in your car, or with friends.

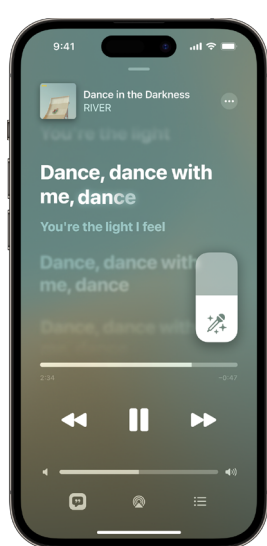

Vocal Control

The Sing experience lets you adjust the vocal levels on any song. A built-in slider in the lyrics view allows you to adjust the vocal volume on any song, so you can control how much of the original vocals you want to hear. Whether you sing along with the original artist, go solo, or mix it up – **the choice is yours.**

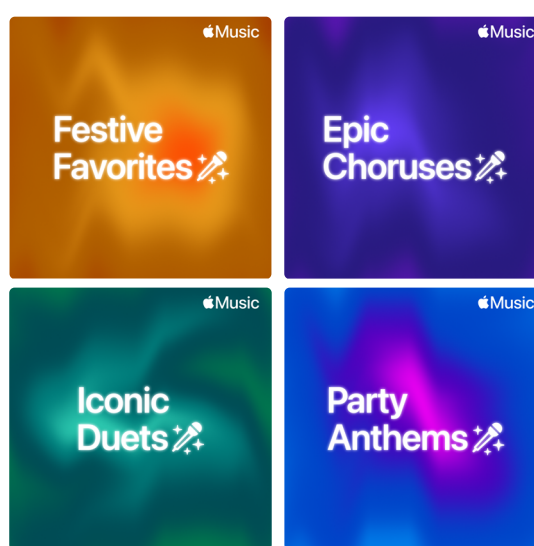

Real-Time Lyrics

All-new, **beat-by-beat lyrics** make it easy to follow and sing along with your favorite songs, now that every syllable is synced in time with the music. Enhancements to background vocals and duets make it fun to sing with friends.

Sing Playlists

Apple Music is introducing **more than 50 dedicated Sing playlists**, containing all of the epic songs, choruses and anthems that make us want to break out in song – all is available right in Apple Music.

Availability

Apple Music Sing will be available in December across a range of our most popular devices, from **iPhone to iPad to Apple TV**. On any of these devices, from big screen to the small, Apple Music Sing delivers the best singing experience in the world.
